

Interstate 295 / Malcolm X Interchange Improvements

PROJECT OVERVIEW

The Department of Homeland Security (DHS) move onto the St. Elizabeth’s Campus required substantial improvements to the I-295/Malcolm X Interchange. Congress established General Services Administration (GSA) as the lead agency to implement the DHS consolidation, including all transportation improvements. GSA secured the services of a Consultant to prepare the design and construction plans for the I-295/Malcolm X Interchange. GSA developed final design plans, specifications, and bid documents. Then, transferred the documents to DDOT through Federal Highway Administration (FHWA) for construction.

The project scope of work includes bridges, retaining walls, reconfiguration of interchanges, storm drainage, lighting, extensive landscaping, continuous shared use path, and other related improvements.

The DDOT team will communicate with residents, ANC Commissioners, civic organization leaders, businesses, and other stakeholders to provide periodic updates on the status of the project.

KEY DESIGN ELEMENTS

- Provide Access to the Department of Homeland Security Headquarters
- Facilitate Access to Joint Base Anacostia-Bolling (JBAB)
- Increase motorist safety by bringing the Interchange up to AASHTO and DDOT Standards
- Add I-295 Southbound Access to Malcolm X Avenue
- Improve Access to Community Resources

MILESTONES

Begin Construction	Late Summer 2018
Complete Construction	Spring 2022
